## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 228, *Tourism and related services*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

## Introduction

Tourism is one of the fastest growing economic sectors in the world and a key driver of socio-economic progress. However, since the pandemic of COVID-19 started, caused by the SARS-CoV-2 coronavirus, the tourism sector has been seriously affected. According to UNWTO (2021), due to COVID-19, the world witnessed an unprecedented 73 % drop in international tourism recorded in 2020, a loss of 1,1 billion international tourists and a loss of US\$ 1,3 trillion in export revenues from tourism. Furthermore, 100 to 120 million jobs are currently effectively at risk.

With such an important impact on the economy, countries have seen the need to identify and implement measures that reduce the spread of the pandemic and recover tourism confidence to travel and to consume tourism services. In this regard, national, regional, public and private protocols with different approaches and scopes have been developed against COVID-19 worldwide, and it seems relevant and necessary to harmonize the measures to reduce the risk of contagion of SARS-CoV-2 in a single protocol, which provides a framework to the countries with the agreed minimum requirements and recommendations to consider during the time the risk of contagion exists.

This document specifies basic requirements and guidelines to prevent the spread of coronavirus in the tourism industry and is complementary to the existing national protocols. These measures will contribute to the recovery of the tourism sector and restore the confidence of travellers.
