## **Measurement of fluid flow by means of pressure-differential devices — Guidelines for the specification of orifice plates, nozzles and Venturi tubes beyond the scope of ISO 5167**

*Mesurage du débit des fluides au moyen d'appareils déprimogènes —  
Lignes directrices pour la spécification des diaphragmes, des tuyères  
et des tubes Venturi non couverts par l'ISO 5167*

## Contents

	Page
Foreword .....	iv
<b>1 Scope .....</b>	<b>1</b>
<b>2 Normative references .....</b>	<b>1</b>
<b>3 Terms and definitions .....</b>	<b>1</b>
<b>4 Symbols .....</b>	<b>1</b>
<b>5 Square-edged orifice plates and nozzles: With drain holes, in pipes below 50 mm diameter, and as inlet and outlet devices .....</b>	<b>3</b>
5.1 Drain holes through the upstream face of the square-edged orifice plate or nozzle .....	3
5.1.1 General .....	3
5.1.2 Square-edged orifice plates .....	3
5.1.3 ISA 1932 nozzles .....	5
5.1.4 Long radius nozzles .....	5
5.2 Square-edged orifice plates installed in pipes of diameter $25 \text{ mm} \leq D < 50 \text{ mm}$ .....	5
5.2.1 General .....	5
5.2.2 Limits of use .....	5
5.2.3 Discharge coefficients and corresponding uncertainties .....	6
5.3 No upstream or downstream pipeline .....	6
5.3.1 General .....	6
5.3.2 Flow from a large space (no upstream pipeline) into a pipeline or another large space .....	6
5.3.3 Flow into a large space (no downstream pipeline) .....	8
<b>6 Orifice plates (except square-edged) .....</b>	<b>9</b>
6.1 Conical entrance orifice plates .....	9
6.1.1 General .....	9
6.1.2 Limits of use .....	9
6.1.3 Description .....	10
6.1.4 Pressure tappings .....	13
6.1.5 Coefficients and corresponding uncertainties .....	14
6.2 Quarter-circle orifice plates .....	14
6.2.1 General .....	14
6.2.2 Limits of use .....	14
6.2.3 Description .....	15
6.2.4 Pressure tappings .....	18
6.2.5 Coefficients and corresponding uncertainties .....	18
6.3 Eccentric orifice plates .....	19
6.3.1 General .....	19
6.3.2 Limits of use .....	20
6.3.3 Description .....	20
6.3.4 Coefficients and corresponding uncertainties .....	23
<b>7 Venturi tubes with machined convergent of angle <math>10,5^\circ</math> .....</b>	<b>25</b>
7.1 General .....	25
7.2 Description .....	25
7.3 Limits of use .....	25
7.4 Discharge coefficient .....	26
7.5 Expansibility [expansion] factor .....	26
7.6 Pressure loss .....	26
7.7 Installation requirements .....	26
<b>Annex A (informative) An example of the calculations in <a href="#">5.1.2</a> .....</b>	<b>28</b>
<b>Bibliography .....</b>	<b>31</b>

## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 30, *Measurement of fluid flow in closed conduits*, Subcommittee SC 2, *Pressure differential devices*.

This third edition cancels and replaces the second edition (ISO/TR 15377:2007), which has been technically revised.
