## Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see [www.iso.org/directives](http://www.iso.org/directives)).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see [www.iso.org/patents](http://www.iso.org/patents)).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see [www.iso.org/iso/foreword.html](http://www.iso.org/iso/foreword.html).

This document was prepared by Technical Committee ISO/TC 258, *Project, programme and portfolio management*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at [www.iso.org/members.html](http://www.iso.org/members.html).

## Introduction

This document provides guidance to people involved in project, programme and portfolio management. It describes terms that are used in documents authored by Technical Committee ISO/TC 258, *Project, programme and portfolio management*, and that meet any of the following criteria, in that they are:

- specific terms used in project, programme and portfolio management;
- part of common language, but used with a specific and exclusive meaning in the context;
- found in ISO recognized dictionaries, but do not have an adequate definition that fits the usage for the context.

This document includes the definition used by most project management organizations, most of the time. A term may have a different meaning within an organization that is not consistent with this document.

While the individual glossaries for governance and portfolio, programme and project management standards provide clarity in terms, a common vocabulary reveals that a term may be understood within the context in which the term is used. The context may be categorized as “activity sectors”, “management discipline” and “subject areas”, as illustrated in [Figure 1](#).

**Figure 1 — How a term derives meaning in context**

The target audience of this document includes, but is not limited to, the following:

- a) executive managers and people involved in sponsoring projects, programmes or portfolios;
- b) people managing projects, programmes or portfolios;
- c) people involved in the management or performance of project management offices;
- d) developers of national or organizational standards.

This document complements the terms and definitions included in ISO 21500:2012, ISO 21503:2017, ISO 21504:2015, ISO 21505:2017, ISO 21508:2018 and ISO 21511:2018.

It is aligned with ISO 704:2009, ISO 860:2007, ISO 1087-1:2000, ISO 1951:2007, ISO 10241-1:2011, ISO 10241-2:2012, ISO 12615:2004, ISO 15188:2001.
