Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 Background	1
5 Mechanisms of mechanical abrasion and scratching of lens surfaces	2
5.1 Discussion and scratch mechanisms.....	2
5.2 Testing and the different forms of damage.....	4
5.3 Assessing surface damage.....	5
6 Test method description	5
6.1 Steel wool test.....	5
6.1.1 Principle.....	5
6.1.2 Description.....	5
6.1.3 Pros and cons.....	7
6.2 Tumble test.....	7
6.2.1 Principle.....	7
6.2.2 Description.....	8
6.2.3 Pros and cons.....	9
6.3 Eraser test.....	9
6.3.1 Principle.....	9
6.3.2 Description.....	9
6.3.3 Pros and cons.....	11
6.4 Bayer test (Oscillating abrasive grain test).....	11
6.4.1 Principle.....	11
6.4.2 Description.....	12
6.4.3 Pros and cons.....	13
6.5 Nano scratch (Diamond point loading device).....	13
6.5.1 Principle.....	13
6.5.2 Description.....	14
6.5.3 Pros and cons.....	14
6.6 Taber abrasion wheel test.....	15
6.6.1 Principle.....	15
6.6.2 Description.....	15
6.6.3 Pros and cons.....	16
6.7 ISO 8980-5 "Minimum requirements for spectacle lens surfaces claimed to be abrasion-resistant".....	16
6.7.1 Principle.....	16
6.7.2 Description.....	17
6.7.3 Pros and cons.....	17
7 Conclusion	18

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 172, *Optics and photonics*, Subcommittee SC 7, *Ophthalmic optics and instruments*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
