Contents

	Page
Foreword	iv
1 Scope	1
2 Terms and definitions	1
3 General considerations	1
4 Sterilization considerations	2
5 Drug-device combination product considerations	3
6 Part listing and description of absorbable related issues in addition to the relevant parts of ISO 10993 series "Biological evaluation of medical devices"	4
6.1 ISO 10993-1:2009, Evaluation and testing within a risk management process	4
6.2 ISO 10993-2:2006, Animal welfare requirements	4
6.3 ISO 10993-3:2003, Tests for genotoxicity, carcinogenicity and reproductive toxicity	4
6.4 ISO 10993-4:2002, Selection of tests for interactions with blood	4
6.5 ISO 10993-5:2009, Tests for <i>in vitro</i> cytotoxicity	5
6.6 ISO 10993-6:2007, Tests for local effects after implantation	6
6.7 ISO 10993-7:2008, Ethylene oxide sterilization residuals	8
6.8 ISO 10993-9:2009, Framework for identification and quantification of potential degradation products	8
6.9 ISO 10993-10:2010, Tests for irritation and delayed-type hypersensitivity	8
6.10 ISO 10993-11:2006, Biological evaluation of medical devices — Part 11: Tests for systemic toxicity	9
6.11 ISO 10993-12:2012, Sample preparation and reference materials	9
6.12 ISO 10993-13:2010, Identification and quantification of degradation products from polymeric medical devices	13
6.13 ISO 10993-14:2001, Identification and quantification of degradation products from ceramics	13
6.14 ISO 10993-15:2000, Identification and quantification of degradation products from metals and alloys	13
6.15 ISO 10993-16:2010, Toxicokinetic study design for degradation products and leachables	13
6.16 ISO 10993-17:2002, Establishment of allowable limits for leachable substances	13
6.17 ISO 10993-18:2005, Chemical characterization of materials	13
6.18 ISO/TS 10993-19:2006, Physico-chemical, morphological and topographical characterization of materials	14
6.19 ISO/TS 10993-20:2006, Principles and methods for immunotoxicology testing of medical devices	14
Annex A (informative) Nomenclature of absorb, degrade and related terms	15
Bibliography	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2. www.iso.org/directives

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received. www.iso.org/patents

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

The committees responsible for this document are ISO/TC 194, *Biological evaluation of medical devices* and ISO/TC 150/SC 2, *Cardiovascular implants and extracorporeal systems*.
