Foreword.....	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions.....	2
3.1 Terms related to measurement methods	2
3.2 Terms related to measurement results.....	3
3.3 Terms related to uncertainty	5
4 Performance characteristics of analytical systems	5
4.1 Introduction	5
4.2 Scope of the method	6
4.3 Calibration	6
4.4 Limit of detection, limit of quantification	10
4.5 Interferences and matrix effects	12
4.6 Accuracy (trueness and precision) and uncertainty of measurement.....	14
4.7 Robustness	14
4.8 Fitness for purpose	15
5 Choosing analytical systems	15
5.1 General considerations	15
5.2 Practical considerations	16
6 Intralaboratory quality control.....	16
6.1 General.....	16
6.2 Terms relating to within-laboratory quality control	17
6.3 Control of accuracy	17
6.4 Control of trueness.....	18
6.5 Control of precision.....	19
6.6 Principles of applying control charts	21
6.7 Conclusions	25
6.8 Control charts with fixed quality criteria (target control charts).....	27
7 Quality control in sampling	27
8 Interlaboratory quality control.....	28
9 Quality control for lengthy analytical procedures or analysis undertaken infrequently or at an ad hoc basis.....	28
9.1 Quality control for lengthy analytical procedures.....	28
9.2 Analysis undertaken infrequently or on an ad hoc basis.....	29
Annex A (informative) Verification of the limit of detection and the limit of quantification	30
Annex B (informative) The nature and sources of analytical errors	32
Annex C (informative) Estimating the measurement uncertainty	35
Annex D (informative) Example for performing quality control for lengthy analytical procedures.....	37
Bibliography	38

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

International Standards are drafted in accordance with the rules given in the ISO/IEC Directives, Part 2.

The main task of technical committees is to prepare International Standards. Draft International Standards adopted by the technical committees are circulated to the member bodies for voting. Publication as an International Standard requires approval by at least 75 % of the member bodies casting a vote.

In other circumstances, particularly when there is an urgent market requirement for such documents, a technical committee may decide to publish other types of document:

- an ISO Publicly Available Specification (ISO/PAS) represents an agreement between technical experts in an ISO working group and is accepted for publication if it is approved by more than 50 % of the members of the parent committee casting a vote;
- an ISO Technical Specification (ISO/TS) represents an agreement between the members of a technical committee and is accepted for publication if it is approved by 2/3 of the members of the committee casting a vote.

An ISO/PAS or ISO/TS is reviewed after three years in order to decide whether it will be confirmed for a further three years, revised to become an International Standard, or withdrawn. If the ISO/PAS or ISO/TS is confirmed, it is reviewed again after a further three years, at which time it must either be transformed into an International Standard or be withdrawn.

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights.

ISO/TS 13530 was prepared by Technical Committee ISO/TC 147, *Water quality*, Subcommittee SC 2, *Physical, chemical and biochemical methods*.

This first edition of ISO/TS 13530 cancels and replaces ISO/TR 13530:1997, which has been technically revised.
