Contents

	Page
Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	2
4 Basic specification	3
4.1 Feed stream pressure	3
4.2 Working temperature	4
4.3 Assembly	4
4.4 Material properties	4
4.4.1 Feed stream pressure	4
4.4.2 Working temperature	4
5 Safety requirements of the PSA system	4
5.1 General hazards associated with the PSA system	4
5.1.1 General hazards associated with hydrogen gas	4
5.1.2 General hazards associated with system leakage	4
5.1.3 Hazards related to pressure	4
5.1.4 Hazards related to ignition of hydrogen	5
5.2 Safety specifications in the field	5
5.2.1 General hazards	5
5.2.2 Layout considerations	5
5.2.3 Buildings and ventilation	5
5.2.4 Explosion-proof area and explosion-proof grade	6
5.2.5 Electrostatic grounding	7
5.2.6 Flammable and toxic gas detection alarm	7
5.3 Safety specifications of equipment and piping	8
5.3.1 General specification	8
5.3.2 Safety specifications of adsorbers	8
5.3.3 Safety specifications of the buffer tank	9
5.3.4 Safety specifications of process control valves	9
5.3.5 Safety specifications of piping	9
5.3.6 Safety considerations for operations and maintenance	10
5.3.7 Safety specifications of inspection and test	10
5.3.8 Safety specifications of electrical equipment	11
5.3.9 Safety specifications of monitoring devices	12
Annex A (informative) Example of potential locations of relief valves	14
Bibliography	15

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT) see the following URL: www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 197, *Hydrogen technologies*.
