Biotechnology — Bioprocessing — General requirements and considerations for equipment systems used in the manufacturing of cells for therapeutic use

*Biotechnologie — Bioprocédés — Exigences et considérations
générales pour les systèmes d'équipement utilisés dans la fabrication
de cellules à usage thérapeutique*

Foreword	iv
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
4 General considerations	4
4.1 General.....	4
4.2 Incorporating equipment and testing into the manufacturing workflow of cells for therapeutic use.....	5
4.3 Unit operation equipment systems.....	6
4.4 Connecting to upstream or downstream processing equipment, or both.....	6
4.5 Monitoring and surveillance software.....	6
4.6 Impurity and toxicity contribution to final cells for therapeutic use.....	6
4.7 Sterility and non-pyrogenicity.....	6
5 Equipment overall performance characteristics and evaluation	7
5.1 General.....	7
5.2 Description of performance characteristics.....	7
5.3 Performance parameters and correlation to cell quality attributes.....	8
6 Components of the equipment system	8
6.1 Hardware.....	8
6.1.1 General.....	8
6.1.2 Physical integrity.....	8
6.1.3 Physical strength.....	9
6.1.4 Packaging.....	9
6.1.5 Recovery of cells.....	9
6.1.6 Validation of performance qualification.....	9
6.1.7 Physical evaluation of equipment and cell sample interaction.....	9
6.1.8 Damage to cells.....	9
6.1.9 Impact to clean room environment.....	10
6.1.10 Monitoring.....	10
6.2 Equipment software for manufacturing of cells for therapeutic use.....	10
6.3 Consumables.....	11
6.3.1 General.....	11
6.3.2 Biocompatibility.....	11
6.3.3 Toxicity of chemical sterilants.....	11
6.3.4 Toxicity of extracted and leached materials.....	12
6.3.5 Particulates.....	12
6.3.6 Stability of disposable single-use components.....	13
7 Documentation and notification of changes	13
7.1 Documentation.....	13
7.1.1 General.....	13
7.1.2 Documentation for off-the-shelf equipment or instruments.....	13
7.1.3 Custom-designed supplier documentation package for equipment or instruments.....	14
8 Use and maintenance of equipment	14
8.1 Use of equipment.....	14
8.2 Maintenance of equipment.....	15
Bibliography	16

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular, the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation of the voluntary nature of standards, the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the World Trade Organization (WTO) principles in the Technical Barriers to Trade (TBT), see www.iso.org/iso/foreword.html.

This document was prepared by Technical Committee ISO/TC 276, *Biotechnology*.

Any feedback or questions on this document should be directed to the user's national standards body. A complete listing of these bodies can be found at www.iso.org/members.html.
