Foreword	v
1 Scope	1
2 Normative references	1
3 Terms and definitions	1
3.1 Definitions.....	2
3.2 Abbreviated terms.....	8
4 Operation of automated liquid handling systems	9
4.1 Types of automated liquid handling systems.....	9
4.1.1 Types of piston operated automated liquid handling systems.....	9
4.1.2 Types of other (pump operated) automated liquid handling systems.....	9
4.2 Adjustment.....	10
4.2.1 Need for adjustment.....	10
4.2.2 Liquid classes.....	10
4.2.3 Adjustment of ALHS settings.....	10
4.3 Tips.....	10
4.3.1 General.....	10
4.3.2 Air-displacement tips.....	10
4.3.3 Positive displacement tips.....	11
4.3.4 Fixed tips.....	11
4.4 Environmental conditions.....	11
4.4.1 Discussion and recommendations.....	11
4.4.2 Factory acceptance testing.....	11
4.4.3 Site acceptance and user testing.....	12
5 Volumetric performance	12
5.1 Introductory discussion.....	12
5.2 Data collection and examination.....	14
5.3 Indexing to track data.....	15
5.3.1 Indexing from the channel perspective.....	15
5.3.2 Indexing from the microplate perspective.....	15
5.4 Descriptive statistics on an individual channel basis.....	16
5.5 Descriptive statistics on a run order basis.....	18
5.6 Descriptive statistics for entire data sets.....	18
5.7 Differences between channels.....	19
5.8 Handling of sub-deliveries.....	19
6 Measurement methods	20
6.1 Overview of methods suitable for measuring ALHS performance.....	20
6.2 Methods for use with any ALHS platform (open methods).....	29
6.2.1 Ratiometric photometry.....	29
6.2.2 Gravimetry, single channel measurement.....	29
6.2.3 Gravimetry, full-plate measurement for correlation with photometry.....	29
6.2.4 Gravimetric regression method for low volumes.....	30
6.2.5 Photometry using Orange G.....	30
6.2.6 Hybrid method: gravimetry and photometry with Tartrazine.....	30
6.2.7 Hybrid method: photometry and gravimetry with <i>p</i> -nitrophenol.....	31
6.2.8 Hybrid method: gravimetry and photometry with Ponceau S.....	31
6.2.9 Pressure sensing.....	31
6.2.10 Calorimetric measurement.....	31
6.2.11 Optical image analysis.....	31
6.3 Methods specific to an ALHS model or accessory (closed methods).....	32
6.3.1 Gravimetry and hybrid method: gravimetry and photometry.....	32
6.3.2 Photometry with Tartrazine.....	32
7 Specification of ALHS volumetric performance	33

Foreword

ISO (the International Organization for Standardization) is a worldwide federation of national standards bodies (ISO member bodies). The work of preparing International Standards is normally carried out through ISO technical committees. Each member body interested in a subject for which a technical committee has been established has the right to be represented on that committee. International organizations, governmental and non-governmental, in liaison with ISO, also take part in the work. ISO collaborates closely with the International Electrotechnical Commission (IEC) on all matters of electrotechnical standardization.

The procedures used to develop this document and those intended for its further maintenance are described in the ISO/IEC Directives, Part 1. In particular the different approval criteria needed for the different types of ISO documents should be noted. This document was drafted in accordance with the editorial rules of the ISO/IEC Directives, Part 2 (see www.iso.org/directives).

Attention is drawn to the possibility that some of the elements of this document may be the subject of patent rights. ISO shall not be held responsible for identifying any or all such patent rights. Details of any patent rights identified during the development of the document will be in the Introduction and/or on the ISO list of patent declarations received (see www.iso.org/patents).

Any trade name used in this document is information given for the convenience of users and does not constitute an endorsement.

For an explanation on the meaning of ISO specific terms and expressions related to conformity assessment, as well as information about ISO's adherence to the WTO principles in the Technical Barriers to Trade (TBT) see the following URL: [Foreword - Supplementary information](#)

The committee responsible for this document is ISO/TMBG, *Technical Management Board Groups*.
