

ANSI C78.44-2016

*American National Standard for Electric Lamps—
Double-Ended Metal Halide Lamps*

Secretariat:

National Electrical Manufacturers Association

Approved: July 1, 2016

American National Standards Institute, Inc.

NOTICE AND DISCLAIMER

The information in this publication was considered technically sound by the consensus of persons engaged in the development and approval of the document at the time it was developed. Consensus does not necessarily mean that there is unanimous agreement among every person participating in the development of this document.

ANSI standards and guideline publications, of which the document contained herein is one, are developed through a voluntary consensus standards development process. This process brings together volunteers and/or seeks out the views of persons who have an interest in the topic covered by this publication. While NEMA administers the process to promote fairness in the development of consensus, it does not write the document and it does not independently test, evaluate, or verify the accuracy or completeness of any information or the soundness of any judgments contained in its standards and guideline publications.

NEMA disclaims liability for any personal injury, property, or other damages of any nature whatsoever, whether special, indirect, consequential, or compensatory, directly or indirectly resulting from the publication, use of, application, or reliance on this document. NEMA disclaims and makes no guaranty or warranty, expressed or implied, as to the accuracy or completeness of any information published herein, and disclaims and makes no warranty that the information in this document will fulfill any of your particular purposes or needs. NEMA does not undertake to guarantee the performance of any individual manufacturer or seller's products or services by virtue of this standard or guide.

In publishing and making this document available, NEMA is not undertaking to render professional or other services for or on behalf of any person or entity, nor is NEMA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances. Information and other standards on the topic covered by this publication may be available from other sources, which the user may wish to consult for additional views or information not covered by this publication.

NEMA has no power, nor does it undertake to police or enforce compliance with the contents of this document. NEMA does not certify, test, or inspect products, designs, or installations for safety or health purposes. Any certification or other statement of compliance with any health- or safety-related information in this document shall not be attributable to NEMA and is solely the responsibility of the certifier or maker of the statement.

AMERICAN NATIONAL STANDARD

Approval of an American National Standard requires verification by The American National Standards Institute, Inc. (ANSI) that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer. An American National Standard implies a consensus of those substantially concerned with its scope and provisions. Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly, and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution.

The existence of an American National Standard does not in any respect preclude anyone, whether s/he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards. It is intended as a guide to aid the manufacturer, the consumer, and the general public.

The American National Standards Institute, Inc., does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute, Inc. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on this title page.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute, Inc., require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute, Inc.

Foreword (This foreword is not part of ANSI C78.44)

Suggestions for improvement of this standard should be submitted to:

Secretariat C78
National Electrical Manufacturers Association
1300 North 17th Street, Suite 900
Rosslyn, Virginia 22209

This standard was processed and approved for adoption by Accredited Standards Committee on Electric Lamps, C78. Committee approval of the standard does not necessarily imply that all committee members voted for that approval.

CONTENTS

Organization of this standard		iv
Part I	General Requirements and Information	
1	Scope	2
1.1	Important Patent Disclaimer	2
2	Normative References	2
3	Definitions	3
4	Methods of Measurement	3
5	Lamp Specifications	3
5.1	Lamp Designations and Description	3
5.2	Lamp Physical Characteristics	3
5.3	Operating Characteristics at 100 Hours	4
5.4	Lamp Reignition Voltage Spike (V_{rs})	4
5.5	Lamp Reignition Voltage (V_r)	4
5.6	Lamp Starting Voltage and Warm-up Requirements	4
5.7	Reference Ballast Requirements	5
6	Information for Ballast Design	5
6.1	Requirements for Lag Ballast	5
6.2	Requirements for Peak-Lead Ballasts	5
6.3	Ignitor Requirements	6
6.4	Starting Current Requirements	6
6.5	Current Crest Factor	6
6.6	Maximum Peak Voltage (across lamp terminals)	6
6.7	Lamp Operating Wattage	6
7	Information for Luminaire Design	7
7.1	Lamp Voltage Rise Limits	7
7.2	UV Attenuation	7
7.3	Lamp Temperatures	7
7.4	Lamp Operating Position	7
7.5	Instant Hot Restrike	7
Part II	Lamp Drawings

Figure 2	Double-Ended with Fc2 Base	11
Figure 3	Double-Ended with RX7s Base	11
Figure 4	Double-Ended with Cable Base	12
Part III	Double-Ended Lamp Data Sheets	
75 Watt	M85 Double-Ended Metal Halide Lamp	14
100 Watt	M91 Double-Ended Metal Halide Lamp	18
150 Watt	M81 Double-Ended Metal Halide Lamp	22
250 Watt	M80 Double-Ended Metal Halide Lamp	26
1500 Watt	M133 Double-Ended Metal Halide Lamp	30
2000 Watt	M134 Double-Ended Metal Halide Lamp	34
ANNEX A	Luminaire Simulator	38

Organization of This Standard

This standard comprises three parts and an annex:

Part I covers general requirements and information. It provides normative references and offers brief explanations of the meaning or the application of some of the numerical data given on the individual lamp data sheets in Part III of this standard. It also provides requirements that are common to all metal halide lamp types.

Part II contains the lamp drawings of each lamp size.

Part III contains the individual lamp double-end data sheets that provide the specific lamp, ballast, and luminaire requirements of the standardized double-ended metal halide lamp type.

Annex A contains the design and dimensions of luminaire simulators needed to measure double-ended metal halide lamps.

I. General Requirements and Information

1 Scope

This standard sets forth the physical and electrical requirements for double-ended metal halide lamps operated on 60 Hz. ballasts to ensure interchangeability and safety. The data given also provides the basis for the electrical requirements for ballasts and ignitors, as well as the lamp-related requirements for luminaires. This standard includes lamps whose arc tubes are made of quartz or ceramic materials. Luminous flux and lamp color is not part of this standard.
