

American National Standard

Approved : 06/19/2014

Secretariat: National Electrical Manufacturers Association

for Electric Lamps—

Assigned LED Lamp Codes ANSI C78.50-2014

An American National Standard implies a consensus of those substantially concerned with its scope and provisions. It is intended as a guide to aid the manufacturer, the consumer, and the general public. The existence of an American National Standard does not in any respect preclude anyone, whether he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards. Users are cautioned to obtain the latest editions.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute.

GUIDE and DISCLAIMER: Information contained herein is informative and shall not be deemed an industry standard. The reader should explore other methods that might be suitable to their needs. This standard contains information and reference to industry standards; through reference in the text, by consent constitutes provisions of this standard. All standards are subject to revision, and parties to agreements based on this standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated herein. This standard may be revised or withdrawn at any time.

American National Standard

Approval of an American National Standard requires verification by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer. An American National Standard implies a consensus of those substantially concerned with its scope and provisions. Consensus is established when, in the judgment of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made toward their resolution. The existence of an American National Standard does not in any respect preclude anyone, whether s/he has approved the standard or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards. It is intended as a guide to aid the manufacturer, the consumer, and the general public.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the Committee Secretary referred to in the foreword.

CAUTION NOTICE: This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

No part of this publication may be reproduced in any form, in an electronic retrieval system or otherwise, without prior written permission of the publisher.

Printed in the United States of America.

FOREWORD

(This foreword is not part of ANSI C78.50.-2014.)

This is a new standard and not a revision of a previous standard.

Suggestions for improvement of this standard should be submitted to:

Senior Technical Director, Operations
National Electrical Manufacturers Association
1300 North 17th Street, Suite 900
Rosslyn VA 22209

This standard was processed and approved by Accredited Standards Committee on Electric Lamps, C78 and its Working Group, C78 WG-09 for Solid State Lighting Sources. Committee approval of the standard does not necessarily imply that all committee members voted for that approval.

American National Standard

PART I General Information

1 Scope

This standard provides physical and electrical characteristics of the group of integrally ballasted Solid State Lighting (SSL) lamps that have standardized characteristics. Lamps with clear, frosted, opaque, and lens end windows and with various reflector and/or emitting coatings are covered. Lamps covered in this standard contain LED based light sources.

2 Normative References

The following standards contain provisions, which through reference in this text constitute provisions of this American National Standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this American National Standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below.

ANSI C78.30-1997 *Procedure for Use in Preparation of Incandescent Lamp Space Drawings*

ANSI C78.379-2006 *Method for the Classification of the Beam Patterns of Reflector Lamps*

ANSI C78.60432-2007, Parts 1 *American National Standard for Electric Lamps—Incandescent Lamps—Safety Specifications*

ANSI C78.60432-2007, Parts 2 *American National Standard for Electric Lamps—Incandescent Lamps—Safety Specifications*

ANSI C81.61-2009 *Electrical Lamp Bases*

ANSI C81.63-2007 *Gauges for Electrical Bases and Lampholders*

Revision of ANSI C79.1: ANSI C78.79-21XX *Nomenclature for Envelope Shapes Intended for Use with Electric Lamps*

ANSI/IEC C78.60360-2002 *Standard Method of Measurement of Lamp Cap Temperature Rise*

ANSI/IESNA RP-27.1-05 *Photobiological Safety for Lamps and Lamp Systems-General Requirements*

ANSI/IESNA RP-27.2-00 *Photobiological Safety for Lamps and Lamp Systems-Measurement Systems*

ANSI/IESNA RP-27.3-96 *Photobiological Safety for Lamps and Lamp Systems-Risk Group Classification*

IES LM-79-08 *Electrical and Photometric Measurements of Solid-State Lighting Products*

UL 1993 *Standards for Safety Self-Ballasted Lamps and Lamp Adapters*

UL 8750 *Standards for Safety Light Emitting Diode (LED) Equipment for Use in Lighting Products*
