## NOTICE AND DISCLAIMER

The information in this publication was considered technically sound by the consensus of persons engaged in the development and approval of the document at the time it was developed. Consensus does not necessarily mean that there is unanimous agreement among every person participating in the development of this document.

The National Electrical Manufacturers Association (NEMA) standards and guideline publications, of which the document contained herein is one, are developed through a voluntary consensus standards development process. This process brings together volunteers and/or seeks out the views of persons who have an interest in the topic covered by this publication. While NEMA administers the process and establishes rules to promote fairness in the development of consensus, it does not write the document and it does not independently test, evaluate, or verify the accuracy or completeness of any information or the soundness of any judgments contained in its standards and guideline publications.

NEMA disclaims liability for any personal injury, property, or other damages of any nature whatsoever, whether special, indirect, consequential, or compensatory, directly or indirectly resulting from the publication, use of, application, or reliance on this document. NEMA disclaims and makes no guaranty or warranty, express or implied, as to the accuracy or completeness of any information published herein, and disclaims and makes no warranty that the information in this document will fulfill any of your particular purposes or needs. NEMA does not undertake to guarantee the performance of any individual manufacturer or seller's products or services by virtue of this standard or guide.

In publishing and making this document available, NEMA is not undertaking to render professional or other services for or on behalf of any person or entity, nor is NEMA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances. Information and other standards on the topic covered by this publication may be available from other sources, which the user may wish to consult for additional views or information not covered by this publication.

NEMA has no power, nor does it undertake to police or enforce compliance with the contents of this document. NEMA does not certify, test, or inspect products, designs, or installations for safety or health purposes. Any certification or other statement of compliance with any health or safety-related information in this document shall not be attributable to NEMA and is solely the responsibility of the certifier or maker of the statement.

## CONTENTS

<b>Section 1 General</b> .....	<b>1</b>
<b>1.1 Scope and Introduction</b> .....	<b>1</b>
<b>1.2 References</b> .....	<b>1</b>
1.2.1 Normative References.....	1
1.2.2 Contacts.....	2
<b>1.3 General Statements</b> .....	<b>4</b>
<b>1.4 Types of DMS</b> .....	<b>4</b>
1.4.1 Dynamic Message Signs (DMS) .....	4
1.4.2 Changeable Message Signs.....	4
1.4.3 Blankout Signs (BOS).....	4
<b>1.5 Types of Technologies</b> .....	<b>5</b>
<b>1.6 Definitions, Terms, and Acronyms</b> .....	<b>5</b>
<b>Section 2 Environmental Requirements</b> .....	<b>16</b>
<b>2.1 Environmental and Operating Standards</b> .....	<b>16</b>
2.1.1 Definitions of Major Units of the DMS Equipment.....	16
2.1.2 Compliance of Major Units .....	16
2.1.3 Electrical.....	17
2.1.4 Transients.....	18
2.1.5 Temperature and Humidity.....	19
2.1.6 Vibration.....	19
2.1.7 Shock.....	20
2.1.8 Time and Timing.....	20
<b>2.2 DMS Equipment Tests</b> .....	<b>20</b>
2.2.1 Test Facilities (Except Vibration and Shock).....	20
2.2.2 Test Unit .....	21
2.2.3 Test Functions .....	21
2.2.4 Test G: Vibration Test.....	25
2.2.5 Test H: Shock (Impact) Test.....	26
2.2.6 Test J: Power Interrupt Tests .....	27
2.2.7 Test K: Timing Accuracy Tests.....	28
<b>Section 3 DMS Mechanical Construction</b> .....	<b>30</b>
<b>3.1 General</b> .....	<b>30</b>
3.1.1 Weather-Tight Enclosure.....	30
3.1.2 Temperature Control .....	30
3.1.3 DMS Face.....	31
3.1.4 Galvanic Protection .....	31
3.1.5 Light Leaks .....	31
3.1.6 Contrast Border .....	31
<b>3.2 Fixed-Location DMS</b> .....	<b>32</b>
3.2.1 Design Life of Fixed DMS.....	32
3.2.2 Structural integrity.....	32
3.2.3 Aluminum Housings.....	32
3.2.4 Housings Made of Other Materials.....	33
3.2.5 Front and Rear Access.....	33
3.2.6 Front Access DMS.....	33
3.2.7 Rear Access DMS .....	33
3.2.8 Walk-In Access DMS.....	34

## FOREWORD

This NEMA Standards Publication, TS 4-2016, *Hardware Standards for Dynamic Message Signs (DMS), with NTCIP Requirements*, was developed to standardize minimum performance requirements and specifications for design and implementation of dynamic traffic messaging equipment that can be safely installed and provided to the end user with operational features based on current technology. Within NEMA TS 4-2016, any reference to a specific manufacturer is strictly for the purpose of defining interchangeability where there exists no nationally recognized standard covering all the requirements. The manufacturer references do not constitute a preference. NEMA TS 4-2016 is intended to reduce hazards to persons and property when traffic-messaging equipment is properly selected and installed in conformance with the requirements herein.

A future version of NEMA TS 4-2016 may address alternative non-grid power sources.

The user's attention is called to the possibility that compliance with NEMA TS 4-2016 may require use of an invention covered by patent rights. By publication of NEMA TS 4-2016, no position is taken with respect to the validity of any claims or of any patent rights in connection therewith.

In the preparation of NEMA TS 4-2016, input of users and other interested parties has been sought and evaluated. Inquiries, comments, and proposed or recommended revisions should be submitted to the concerned NEMA product subdivision by contacting the:

Senior Technical Director, Operations  
National Electrical Manufacturers Association  
1300 North 17<sup>th</sup> Street, Suite 900  
Rosslyn, Virginia 22209

The Dynamic Message Sign Technical Committee developed NEMA TS 4-2016 under the auspices of the NEMA Transportation Management Systems and Associated Control Devices Section (3TS), of which it is a part.

At the time that NEMA TS 4-2016 was prepared, the following NEMA members and their representatives were active voting members of the NEMA 3TS Dynamic Message Sign Technical Committee (3TS DMS TC):

- Adaptive Micro Systems, Inc. [www.adaptivedisplays.com](http://www.adaptivedisplays.com)
- Daktronics, Inc. [www.daktronics.com](http://www.daktronics.com) (Co-Chairs)
- Parsons [delcantechologies.com](http://delcantechologies.com)
- SES America [sesamerica.com](http://sesamerica.com)
- Skyline Products, Inc. [www.skylineproducts.com](http://www.skylineproducts.com)
- Ver-Mac, Inc. [www.ver-mac.com](http://www.ver-mac.com)

3TS section approval of NEMA TS 4-2016 does not necessarily imply that all Section members voted for its approval or participated in its development. When NEMA TS 4-2016 was approved, the Transportation Management Systems and Associated Control Devices Section was composed of the following members:

- Adaptive Micro Systems, Inc. [www.adaptivedisplays.com](http://www.adaptivedisplays.com)
- Applied Information, Inc. [appinfoinc.com](http://appinfoinc.com)
- Daktronics, Inc. [www.daktronics.com](http://www.daktronics.com)
- Eberle Design, Inc. [www.editraffic.com](http://www.editraffic.com)
- Horizon Signal Technologies, Inc. [www.horizonsignal.com](http://www.horizonsignal.com)
- Intelight Inc. [www.inteligh-its.com](http://www.inteligh-its.com)
- John Thomas, Inc. [www.jititraffic.com](http://www.jititraffic.com)
- OMJC Signal, Inc. [www.omjcsignal.com](http://www.omjcsignal.com)

- Parsons [delcantechologies.com](http://delcantechologies.com)
- Peek Traffic Corporation [www.peaktraffic.com](http://www.peaktraffic.com)
- SES America [sesamerica.com](http://sesamerica.com)
- Siemens Industry, Inc. [www.industry.usa.siemens.com](http://www.industry.usa.siemens.com)
- Skyline Products, Inc. [www.skylineproducts.com](http://www.skylineproducts.com)
- TransCore, ITS, LLC [www.transcore.com](http://www.transcore.com)
- Ver-Mac, Inc. [www.ver-mac.com](http://www.ver-mac.com)

## History

As the implementation of dynamic message signage and general light emitting technology increased in the United States during the late 1980s and early 1990s, various transportation departments tried a number of diverse technologies to meet their signing needs. This eventually led to a wide variety of agency specifications developed across the country, a number of opposing philosophies for implementation by the users, and some unsubstantiated claims by manufacturers. It also led to conflicting definitions and references from one agency to the next for what constituted a dynamic message sign (DMS) or its use.

In 1995, based on industry need, NEMA created the NEMA 3TS Transportation Section.

In August 1997, the DMS manufacturers formed a new committee of the NEMA Transportation Section and met for the first time to outline a plan for developing this hardware standard. Between 1997 and 2005, the NEMA 3TS section developed NEMA TS 4-2005. In 2005 NEMA TS 4-2005 was published and used by the transportation industry.

In 2012, the NEMA 3TS Section authorized a project to revise existing NEMA TS 4-2005. That project resulted in NEMA TS 4-2016, which removes older DMS technology and incorporates the new full color technology available. The 3TS Section, particularly its Dynamic Message Sign Technical Committee also worked to harmonize NEMA TS 4-2016 with EN 12966-1 for Environmental, Display, and testing requirements. The major sections overhauled during this project are Section 2 Environmental Requirements, Section 5 Display Properties, Section 8 Electronics and Electrical. Minor revisions occurred in other portions of NEMA TS 4-2016 to reflect the removal of older display technologies. NEMA TS 4-2016 incorporates all of the current best practices of the industry for specifying a DMS.

## **Section 1 General**

### **1.1 Scope and Introduction**

The goal of NEMA TS 4-2016 is to provide the user with safe, dependable, functional, and easily maintained Dynamic Message Sign (DMS) equipment.

NEMA TS 4-2016 defines the minimum hardware and functional characteristics of electronically controlled DMS used for displaying messages to travelers.

NEMA TS 4-2016 predominantly addresses DMS.

Conformance to NEMA TS 4-2016 is defined in Section 11.

Portions of NEMA TS 4-2016 may be referenced as part of agency (procurement) specifications.

NEMA TS 4-2016 is not intended to be, or is meant to take the place of any application guides for DMS.

Items such as sign siting practices, selection of character heights, siting of cabinets and relations between legibility and travel speed, etc. were all considered to be outside the scope of NEMA TS 4-2016.
