Disclaimers¹

NSF, in performing its functions in accordance with its objectives, does not assume or undertake to discharge any responsibility of the manufacturer or any other party. The opinions and findings of NSF represent its professional judgment. NSF shall not be responsible to anyone for the use of or reliance upon this Standard by anyone. NSF shall not incur any obligation or liability for damages, including consequential damages, arising out of or in connection with the use, interpretation of, or reliance upon this Standard.

NSF Standards provide basic criteria to promote sanitation and protection of the public health. Provisions for mechanical and electrical safety have not been included in this Standard because governmental agencies or other national standards-setting organizations provide safety requirements.

Participation in NSF Standards development activities by regulatory agency representatives (federal, local, state) shall not constitute their agency's endorsement of NSF or any of its Standards.

Preference is given to the use of performance criteria measurable by examination or testing in NSF Standards development when such performance criteria may reasonably be used in lieu of design, materials, or construction criteria.

The illustrations, if provided, are intended to assist in understanding their adjacent standard requirements. However, the illustrations may not include **all** requirements for a specific product or unit, nor do they show the only method of fabricating such arrangements. Such partial drawings shall not be used to justify improper or incomplete design and construction.

Unless otherwise referenced, the annexes are not considered an integral part of NSF Standards. The annexes are provided as general guidelines to the manufacturer, regulatory agency, user, or certifying organization.

¹ The information contained in this Disclaimer is not part of this American National Standard (ANS) and has not been processed in accordance with ANSI's requirements for an ANS. As such, this Disclaimer may contain material that has not been subjected to public review or a consensus process. In addition, it does not contain requirements necessary for conformance to the Standard.

NSF International Standard for Dietary Supplements —

Dietary supplements

5 Product requirements

All dietary supplements shall meet all applicable regulatory requirements.

.

5.2 Quantity

5.2.1 Raw materials

The quantity of marker constituents shall be verified in accordance with 6.2 when declared on the certificate of analysis. Other declarations made in the Certificate of Analysis and/or the Raw Material Specification shall be verified in accordance with 6.2, 7.4 and/or 8.

5.2.2 Finished products

The quantity of dietary ingredients and/or marker constituents declared on the label shall be verified in accordance with 6.2 and/or 8. Nutritional declarations will be verified in accordance with 6.2 only when the quantity claimed is greater than 2% of the daily recommended value (DRV) (based on the reference caloric intake of 2,000 calories) as detailed in the following table (Ref. is 21 CFR 101.9).

Component	DRV (units)	Level requiring testing
fat	65 g	> 1.3 g/serving
saturated fatty acids	20 g	> 0.4 g/serving
cholesterol	300 g	> 6 g/serving
total carbohydrate sugar	300 g	> 6 g/serving
fiber	25 g	> 0.5 g/serving
sodium	2,400 mg	> 48 mg/serving
potassium	3,500 mg	> 70 mg/serving
protein	50 g	> 1 g/serving

The product shall contain at least 100% (minus the measure of uncertainty) of the quantity of each Class I dietary ingredient and/or marker constituent declared on the label.

The product shall contain at least 80% (minus the measure of uncertainty) of the quantity of each Class II dietary ingredient and/or marker constituent declared on the label. The product shall not contain quantities in excess of those permitted by GMP (manufacturer's specifications).
