Revision of  
ANSI Z80.30-2010

American National Standard  
for Ophthalmics –  
**Toric Intraocular Lenses**

Secretariat  
**The Vision Council**

Approved April 24, 2018  
Published June 18, 2018

**American National Standards Institute, Inc.**

## American National Standard

Approval of an American National Standard requires review by ANSI that the requirements for due process, consensus, and other criteria for approval have been met by the standards developer.

Consensus is established when, in the judgement of the ANSI Board of Standards Review, substantial agreement has been reached by directly and materially affected interests. Substantial agreement means much more than a simple majority, but not necessarily unanimity. Consensus requires that all views and objections be considered, and that a concerted effort be made towards their resolution.

The use of American National Standards is completely voluntary; their existence does not in any respect preclude anyone, whether he has approved the standards or not, from manufacturing, marketing, purchasing, or using products, processes, or procedures not conforming to the standards.

The American National Standards Institute does not develop standards and will in no circumstances give an interpretation of any American National Standard. Moreover, no person shall have the right or authority to issue an interpretation of an American National Standard in the name of the American National Standards Institute. Requests for interpretations should be addressed to the secretariat or sponsor whose name appears on the title page of this standard.

**CAUTION NOTICE:** This American National Standard may be revised or withdrawn at any time. The procedures of the American National Standards Institute require that action be taken periodically to reaffirm, revise, or withdraw this standard. Purchasers of American National Standards may receive current information on all standards by calling or writing the American National Standards Institute.

**Foreword** (This foreword is not part of American National Standard ANSI Z80.30-2018.)

In 1985, the Z80 committee became an ANSI accredited standards committee. The scope of the Z80 committee is the development of standards for the field of ophthalmic optics.

The Z80.30 standard deals with toric intraocular lenses used to correct for astigmatism in either phakic or aphakic eyes. The Z80.30 committee originated from the Z80.7 committee on intraocular lenses. Intraocular lenses have become the most common functional prosthetic implanted in the world today. Reproducibility is such that these lenses are no longer meant just restore basic visual function but are expected to achieve excellent visual function. The Z80.30 standard addresses the additional requirements for a new generation of intraocular lenses that correct for pre-existing and surgically induced astigmatism. Unlike the Z80.7 standard, the Z80.30 toric standard is for both aphakic and phakic lenses.

This standard contains four annexes. Annex A is normative and is considered part of this standard. Annexes B, C, and D are informative and are not considered part of this standard.

Suggestions for improvement of this standard will be welcome. They should be sent to: The Vision Council, 225 Reinekers Lane, Suite 700, Alexandria, VA 22034.

This standard was processed and approved for submittal to ANSI by the Accredited Standards Committee on Ophthalmic Standards, Z80. Committee approval of this standard does not necessarily imply that all committee members voted for its approval. At the time it approved this standard, the Z80 Committee had the following members:

Thomas C. White, Chairperson  
Neil Roche, Vice-Chairman  
William J. Benjamin, O.D., Secretary  
Michael Vitale, Secretariat

<i>Organization Represented</i>	<i>Name of Representative</i>
Advanced Medical Technology Association .....	Michael Pflieger
American Academy of Ophthalmology .....	Thomas White
American Academy of Optometry.....	David Loshin
American Ceramic Society .....	Lyle Rubin
American Glaucoma Society .....	Steven Gedde
American Optometric Association .....	Karl Citek
American Society of Cataract and Refractive Surgery .....	Stephen Klyce
Contact Lens Institute .....	Stan Rogaski
Contact Lens Manufacturers Association .....	Martin Daising
Cornea Society .....	Michael Belin
Department of Veterans Affairs .....	John Townsend
Food & Drug Administration CDRH/Division.....	Don Calogero
Individual .....	Ralph Stone

National Association of Optometrists & Opticians .....	Nick Mileti
Optical Laboratory Association .....	Steve Sutherland
Opticians Association of America .....	Tom Hicks
Sunglass Association of America .....	Tibor Gross
The Vision Council.....	Michael Vitale
ISO TC 172/SC7.....	Michael Vitale

The subcommittee on Intraocular Lenses, which developed this standard, has the following members:

Carl Tubbs, SC4 Chair  
Raj Suryakumar, Leader

Ophelia Biggs  
Don Calogero  
Carrie Garufis  
George Green  
Gene Hilmantel  
Jame Hoffman  
Srichand Jasti  
Sanjeev Kasthurirangan  
Michael Pleger  
Nicholas Tarantino  
Steve Van Noy  
James Wolffsohn

## American National Standard for Ophthalmics –

# Toric Intraocular Lenses

### 1 Scope and purpose

This standard applies to any monofocal intraocular lens (IOL) whose primary indication is the reduction of astigmatism either with the correction of aphakia or the modification of the refractive power of a phakic eye. It does not include IOLs used to correct presbyopia.

This standard addresses the vocabulary, optical properties and test methods, mechanical properties and test methods, labeling, biocompatibility, sterility, shelf-life and transport stability, and clinical investigations necessary for this type of device. As applies to any standard, alternative validated test methods may be used.

### 2 Normative references

The following standards and regulations contain provisions that, through reference in this text, constitute provisions of this American National Standard. At the time of publication, the editions indicated were valid. All standards are subject to revision, and parties to agreements based on this American National Standard are encouraged to investigate the possibility of applying the most recent editions of the standards indicated below. Members of the IEC and ISO maintain registers of currently valid International Standards.

ANSI Z80.7, *Ophthalmics – Intraocular lenses*

ANSI Z80.13, *Ophthalmics – Phakic intraocular lenses*

ISO 10993-2, *Biological evaluation of medical devices – Part 2: Animal welfare requirements*

ISO 10993-6, *Biological evaluation of medical devices – Part 6: Tests for local effects after implantation*

ISO 14155-1, *Clinical investigation of medical devices – Part 1: General requirements*
