ANSI A100.1-2018
Revision of ANSI/WCMA A100.1-2014

STANDARD

FOR SAFETY OF

WINDOW COVERING PRODUCTS

SPONSOR

WINDOW COVERING MANUFACTURERS ASSOCIATION, INC.

American National Standards Institute
Approved January 8, 2018
FOREWORD

WCMA standards, of which the document contained herein is one, are developed through a consensus standards development process approved by the American National Standards Institute. This process brings together volunteers representing varied viewpoints and interests to achieve consensus around window covering products and safety issues. While the WCMA administers the process and establishes rules to promote fairness in the development of consensus, it does not independently test, evaluate, or verify the accuracy of any information or the soundness of any judgments contained in any such standards.

The WCMA disclaims liability for any personal injury, property, or other damages of any nature whatsoever, whether special, indirect, consequential or compensatory, directly or indirectly resulting from the publication, use of, or reliance on this document. The WCMA also makes no guaranty or warranty as to the accuracy or completeness of any information published herein.

In issuing and making this document available, the WCMA is not undertaking to render professional or other services for or on behalf of any person or entity. Nor is the WCMA undertaking to perform any duty owed by any person or entity to someone else. Anyone using this document should rely on his or her own independent judgment or, as appropriate, seek the advice of a competent professional in determining the exercise of reasonable care in any given circumstances.

The WCMA has no power, nor does it undertake, to police or enforce compliance with the contents of this document. Nor does the WCMA list, certify, test or inspect products, designs, or installations for compliance with this document. Any certification or other statement of compliance with the requirements of this document shall not be attributable to the WCMA and is solely the responsibility of the certifier or maker of such statement.

1 SCOPE

1.1 Background: The members of the Window Covering Manufacturers Association, Inc. (WCMA), recognizing that unfortunate accidents, including strangulation, have occurred among young children using certain products made or imported by members of the industry, have prepared this Standard in cooperation with the U.S. Consumer Product Safety Commission (CPSC).

This Standard is not intended to inhibit, but rather to encourage, the development of devices and methods that shall further improve the safety of products manufactured by industry members. Manufacturers and other users of this Standard are requested to submit suggestions for improvements to WCMA.

Members of WCMA, in recognition of continuing improvements to be made, shall sponsor appropriate revisions to this Standard on a regular basis.

1.2 This Standard applies to all interior window covering products. The items covered include the products listed in 1.3.

1.3 Types of window covering products documented in this standard include, but are not limited to, cellular shades, horizontal blinds, pleated shades, roll up style blinds, roller shades, sheer shades, Roman style shades, traverse rods (including products that are used with traverse rods, e.g., curtains and drapes), panel tracks, and vertical blinds. These products can be manufactured and distributed as either stock or custom products. (See Section 3 for definitions of these terms.)

2 GENERAL

2.1 Objective: The objective of this Standard is to provide requirements for products documented in this standard in 1.2 and 1.3 that reduce the possibility of injury, including strangulation, to young children from the bead chain, cord, or any type of flexible Loop.

2.2 Values: Required values given in this Standard are given in U.S. units. The SI (metric) equivalents are approximate.

2.3 Tolerances: Where only plus or minus values are given, they are permitted to be exceeded or reduced as appropriate at the option of the manufacturers. Linear dimensions expressed without specific tolerances or not marked maximum or minimum shall be plus or minus 1/32 in (1 mm).

2.4 Reference Documents: All documents referenced are included in Appendix A: Reference Documents.

2.5 Products: Product types are described and / or illustrated in Appendix H: Product Illustrations.

3 DEFINITIONS

<table>
<thead>
<tr>
<th>Genus</th>
<th>ID</th>
<th>Term</th>
<th>Definition</th>
</tr>
</thead>
<tbody>
<tr>
<td>1. Window Covering products</td>
<td>1.01</td>
<td>Cellular Shades</td>
<td>Multiple layers of material formed into tubes or cells, whose operation consists of raising and lowering.</td>
</tr>
<tr>
<td></td>
<td>1.02</td>
<td>Horizontal Blinds</td>
<td>Rigid horizontal slats, suspended from a headrail by Ladders, and whose operation may include tilting, raising and lowering.</td>
</tr>
<tr>
<td></td>
<td>1.03</td>
<td>Pleated Shades</td>
<td>Single or multiple layers of material with permanent pleats in a horizontal orientation, whose operation consists of raising and lowering.</td>
